Arlo Security Light System
Quick Start Guide

Welcome

Thank you for choosing Arlo.

Keep reading for important info to help you get your new Arlo Security Light System up and running.

If you need help, contact Arlo before returning your product to the store. Most questions can be answered through our online support center at arlo.com/support.

What's in the box

Arlo Bridge

Wire-Free Smart Security Light

Outdoor security mount and screws

Rechargeable battery

USB cable

Indoor AC power adapter (varies by region)

Window decal

Get the app

Download the free Arlo app to get started.

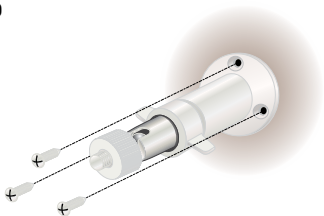

The app guides you through setting up your bridge and lights.

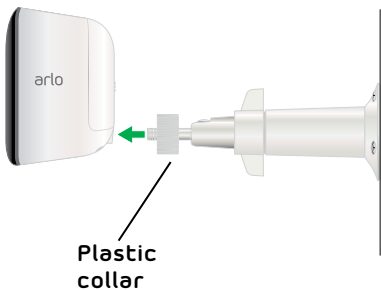

Note: If you already use the Arlo app, make sure that you are using the latest version.

Mount your light

1. Use the provided screws to attach the mount to a wall.

2. Tighten the metal collar on the mount to secure the post.
3. Screw the security light onto the threaded post.
4. Tighten the plastic collar to secure the light.

5. Tilt and swivel the light to the position you prefer.

Find the best spot for your bridge

After you place your lights, move your bridge as needed to a location that optimizes the signal between your lights and your bridge.

If you can't find a bridge location that connects to all of the lights around your property, you can expand your coverage by adding an extra Arlo Bridge (sold separately).

To optimize your bridge location, do the following:

- Make sure that your bridge is within range of your WiFi router.
- Place your bridge in a location where each light is about the same distance from the bridge.
- Elevate your bridge by plugging it into an outlet that is located above ground level, such as above a counter.
- Do not plug the bridge into a power strip that is on the floor.
- Try to minimize the number of walls between your bridge and your lights. Thick or insulated walls can reduce the range.

You're done!

Congratulations! Your Arlo Security Light System is set up and ready to go.

Helpful tips

Each light comes with a rechargeable battery.

Insert a battery into your light

1. Open the battery compartment by pressing and releasing the back of the security light.
2. Align the battery contacts.
3. Insert the battery.
4. Replace the battery compartment cover.

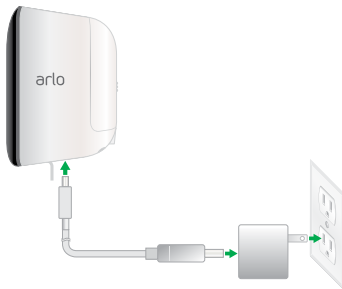

Charge a battery

You can use the USB cable and the indoor AC power adapter that came in the box to plug in your light. When you plug in a light, its battery automatically charges.

1. Connect the USB cable to the light and to the AC power adapter.
2. Plug the AC power adapter into an indoor wall socket.

You can use the Arlo app to view the battery charging status.

Note: If you want to plug in your security light outdoors, use the Arlo outdoor power adapter (sold separately).
